The quality choice in medicine and the life sciences

# Thieme Medical E-Journals

**Thieme Medical E-Journals** are especially designed for the research and information needs of academic institutions, medical schools, hospitals, research facilities and the healthcare industry.

Our E-Journals interface is a sophisticated web service available for PCs, tablets and smartphones presenting tables of contents, abstracts and full text in high quality interactive format.

Users will be kept abreast of cutting edge developments with fast and efficient online delivery and powerful searching tools.

The screenshot displays the Thieme Medical E-Journals website interface. The top navigation bar includes the Thieme logo, the journal title 'Endoscopy', and a search bar with a 'Full-text search' dropdown. Below the navigation bar, there are links for 'Journal', 'Authors', 'Subscription', 'Special Section', and 'Job Board'. The main content area shows the journal cover for 'Endoscopy' on the left and a list of articles on the right. The first article is titled 'Successful closure of a gastropulmonary fistula after esophagectomy using the Apollo Overstitch and endoscopic vacuum therapy' and includes a 'Full Text' button with options for 'HTML' and 'PDF (301 kb)'. The second article is titled 'Gastric peroral endoscopic myotomy for the treatment of refractory gastroparesis: a multicenter international experience' and includes a 'Full Text' button with options for 'HTML' and 'PDF (452 kb)'. The interface also features a sidebar with filters for 'Year' (set to 2018) and 'Issue', and a list of issues. The bottom of the page shows a list of authors for the second article.

# Selected top titles from the Thieme E-Jour

The **American Journal of Perinatology** is an international, peer-reviewed, and indexed journal publishing original research and topical reviews in neonatal and maternal-fetal medicine. From 2011 all subscribers will also receive the open-access companion *Journal AJP Reports*.

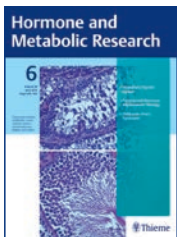

**European Journal of Pediatric Surgery** updates you on vital developments in pediatric surgery. Written by surgeons, physicians, anesthesiologists, radiologists, and others involved in the surgical care of neonates, infants, and children, EJPS is an indispensable resource for all specialists.

**Facial Plastic Surgery** is an indexed review journal that publishes topic-specific issues covering areas of aesthetic and reconstructive plastic surgery as it relates to the head, neck, and face. Publishing six times a year, the journal's scope includes issues devoted to scar revision, periorbital and mid-face rejuvenation, facial trauma, facial implants, rhinoplasty, neck reconstruction, cleft palate, face lifts, as well as various other emerging minimally invasive procedures.

Covering recent advances in psychotropic drugs, **Pharmacopsychiatry** provides psychiatrists and pharmacologists with key clinical insights, new treatment approaches and novel avenues of research. The basis of psychiatric disorders are explored using models and model theory as applied to clinical and experimental studies.

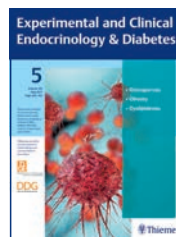

**Hormone and Metabolic Research** covers the fields of endocrinology and metabolism from both a clinical and basic science point of view. With a preference for experimental over observational studies, this journal disseminates new and reliable experimental data to researchers, scientists and doctors worldwide.

The **Journal of Reconstructive Microsurgery** is an international, peer-reviewed, and indexed journal dealing with original research and topical reviews for the practising microsurgeon. It is the official journal of three professional societies, including the World Society for Reconstructive Microsurgery.

**International Journal of Sports Medicine** publishes original research and review articles related to the field of sports medicine and exercise science. Dealing with both basic and applied information, the journal explores how human performance can be understood through the study of physiology, biochemistry, biomechanics and genetics.

**Experimental and Clinical Endocrinology & Diabetes** features outstanding articles covering all fields of endocrinology and diabetology. Case reports, original contributions and short communications appear in each issue along with reviews addressing current topics.

**Endoscopy** is the premier journal on international developments in gastrointestinal endoscopy. From top quality review articles and original contributions to fast, in-depth coverage of the most important national and international meetings to valuable surveys of diagnostic and therapeutic advances.

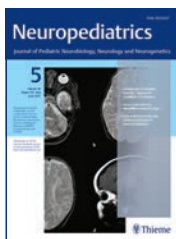

**Journal of Hand and Microsurgery (JHAM)** is the official journal of the Society of Indian Hand and Microsurgeons. JHAM's mission is to advance the medical science and practice of hand and reconstructive microsurgery through education, research and advocacy on behalf of patients and practitioners. Original and review articles, point of technique articles, and case reports related

to the understanding of diseases, diagnosis, and management of the upper extremity disorders, brachial plexus injuries, congenital hand problems, hand trauma, fractures, tumors, burns and reconstructive microsurgery are considered for publication.

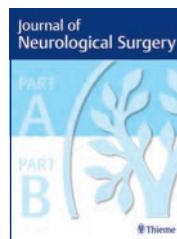

*"Endoscopy is a leading journal in the field of GI endoscopy by publishing original papers on new developments in the field of diagnostic and therapeutic endoscopy. The central focus of Endoscopy is to present our readers practical solutions to current and future endoscopic dilemmas that are based on evidence-based medicine but also on opinions of experts in the field. In addition, our journal features special articles addressing complicated procedures and how to perform them. Of course, we are proud to publish state-of-the-art guidelines which are worldwide implemented."*

Dr. Peter Siersema, Radboud University Medical Center

# nals platform

**Neuropediatrics** is the worldwide journal of choice for key insights into today's practice of pediatric. Original articles, case reports and panel discussions are the distinctive features of a journal that always keeps abreast of current developments and trends – the reason it has developed into an internationally recognized forum for specialists throughout the world.

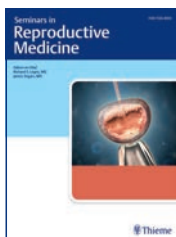

The **Journal of Neurological Surgery (JNLS)** is a major monthly publication from the world's leading publisher in neurosurgery. The renowned expertise of Central European Neurosurgery (formerly Zentralblatt für Neurochirurgie), Minimally Invasive Neurosurgery and Skull Base have been combined and expanded into one journal.

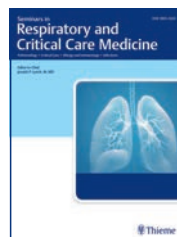

**Seminars in Hearing** is an indexed review journal that publishes topic-specific issues in the field of audiology including areas such as hearing loss, auditory disorders and psychoacoustics. It is an approved provider of continuing education points by the American Academy of Audiology.

**Seminars in Speech and Language** is a topic-specific, indexed review journal covering the entire spectrum of speech language pathology as it relates to both children and adults. It is an approved provider of continuing education points by the American Speech-Language-Hearing Association.

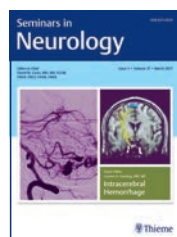

**Seminars in Reproductive Medicine** is a topic-specific, indexed review journal that provides in-depth coverage of important advances in the understanding of normal and disordered human reproductive function, as well as new diagnostic and interventional techniques.

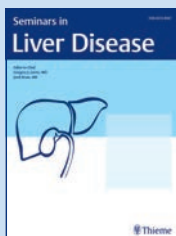

**Seminars in Respiratory and Critical Care Medicine** is an indexed review journal that publishes topical issues on respiratory and pulmonary disorders.

**Seminars in Thrombosis and Hemostasis** is a topic-specific, indexed review journal that focuses on all issues relating to hemostatic and thrombotic disorders.

**Seminars in Neurology** is an indexed review journal that publishes topic-specific issues devoted to a range of key themes in contemporary neurology.

**Seminars in Liver Disease** is an indexed review journal that publishes topic specific issues related hepatology and gastroenterology. It is the premiere review journal in the field, and provides in-depth coverage on a range of topics such as cirrhosis, transplantation, vascular and coagulation disorders, and pediatric liver diseases.

**Journal of Wrist Surgery** covers a range of issues relating to the orthopedic techniques of wrist and small joint arthroscopy, arthroplasty, and reconstructive surgery of the wrist and carpus. In addition to original peer-review articles, this quarterly periodical provides details on emerging surgical techniques, as well as case reports, reviews, and special focus sections. Topics of interest include scapholunate ligament repair and reconstruction, partial carpal fusions, foveal TFCC repair and distal radius fractures.

*“Over the past three decades Seminars has established itself as a premier source of outstanding reviews of the important issues in hepatology, with a unique format that combines important new clinical information with relevant basic science background material.”*

Dr. Eugene R. Schiff, University of Miami School of Medicine

## Package Options

A selection of our best-selling medical journals is available as site license with highly attractive pricing options. Please contact us to have non-committal free trial access to the collection set up for your institution.

## Backfiles

Thieme medical journal backfiles provide crucial clinical information directly to your desktop, ensuring that your institution's collection is accessible, comprehensive, and complete. Institutions can access Thieme medical journal backfiles by purchasing them on a per journal basis or as a complete package, paying a one-time fee.

### e ▶ First

Selected journals publish articles online ahead of print publication through our eFirst service. eFirst articles are available immediately following completion of the peer review process, providing expedient access to critical research results.

### OPEN ACCESS

Thieme Open is the gateway to the open access journal content from the Thieme Publishing Group. It covers both fully open access journals, as well as articles published on an open access basis in our subscription journals. All open access content published by Thieme is freely and permanently available online.

As you would expect from Thieme, all our open access journals are subject to thorough, independent peer review. Our open access articles meet the same high quality of editorial, author and production services you have gotten used to from Thieme.

Visit <http://open.thieme.com> for information about all our open access titles.
