BOOK CONTENTS

Preface XIII

Using the CD XV

Chapter 1 Overview 1
1.1 Introduction 1
1.2 Newton's Method 2
1.3 Restrictions of Small Strain 4
1.4 Stress Stiffening 5
1.5 Buckling 6
   1.5.1 Snap Through 7
   1.5.2 Thermal Buckling 8
   1.5.3 Euler's Column 8
   1.5.4 Moment Distribution 9
   1.5.5 Eigenvalue Approach 12
   1.5.6 An Exact Approach 15
1.6 Prestress 17
   1.6.1 A Fundamental Theorem 18
1.7 Problems 21

Chapter 2 Linear Structural Analysis 23
2.1 Introduction 23
2.2 The Truss Problem 25
2.3 Computer Programs 29
   2.3.1 Programs P1-TR3D.FOR and P2-TR2D.FOR 30
2.4 Examples 30
   2.4.1 Example 2.1. A 3-Bar Truss 30
   2.4.2 Example 2.2. A 24-Bar Space Truss Dome 32
   2.4.3 Example 2.3. A 72-Bar Double Layered Grid 35
2.5 Problems 39

Chapter 3 "Exact" Analysis of Trusses 41
3.1 Introduction 41
3.2 Linearization of the Joint Equilibrium Equations 42
3.3 The Geometric Stiffness Matrix 43
3.4 Overall Buckling 47
3.5 Computer Programs
3.5.1 Programs P3-TR3DNL.FOR and P4-TR2DNL.FOR 49
3.5.1.1 Nonlinear Analysis and Newton's Method 51
3.5.2 Programs P5-BUCK3D.FOR and P6-BUCK2D.FOR 51
3.6 Examples
3.6.1 Example 3.1. Biot's 2-Bar Prestressed Truss 52
3.6.2 Example 3.2. A Prestressed Cabenent 54
3.6.3 Example 3.3. Plane Truss Buckling 57
3.6.4 Example 3.4. Buckling of a Symmetric 2-Bar Truss 61
3.6.5 Example 3.5. Buckling of a 4-Bar Shallow Space Truss 63
3.6.6 Example 3.6. Buckling of the 24-Bar Dome 66
3.7 Problems 68

Chapter 4 Nonlinear Analysis of Plane Frames 71
4.1 Linear Analysis 71
4.2 Computer Program P7-FR2D.FOR 75
4.2.1 Example 4.1 A Simple Plane Frame 76
4.3 The Geometric Stiffness Matrix 78
4.4 Computer Program P8-FR2DNL.FOR 81
4.4.1 Examples 82
4.4.1.1 Example 4.2. Buckling of a Portal Frame 82
4.4.1.2 Example 4.3. Buckling of a Plane Frame 85
4.4.1.3 Example 4.4. Large Rotations of a Circular Cantilever Beam 87
4.5 Problems 90

Chapter 5 Nonlinear Analysis of Space Frames 93
5.1 Introduction 93
5.2 Linear Analysis 93
5.3 Computer Program P9-FR3D.FOR 98
5.3.1 Example 5.1. A 2-Storey Simple Space Frame 99
5.3.2 Example 5.2. A More Complex Space Frame 102
5.4 Nonlinear Effects 105
5.5 The Geometric Stiffness Matrix 107
5.6 Computer Programs P10-FR3DNL2.FOR, P11-FR3DNL3.FOR and P12-FR3DNL5r 113
5.6.1 Example 5.3. Lateral Torsional Buckling 114
5.7 Problems 119

Chapter 6 Nonlinear Analysis of Membranes 121
6.1 Introduction 121
6.2 The Geometric Stiffness Matrix of the Plane Stress Triangular Finite Element 121
6.3 Three Dimensional Members

6.4 A Direct Alternative Derivation of the Geometric Stiffness Matrix of Three-Dimensional Membranes

6.5 Computer Programs

6.6 Examples

6.7 Problems

Chapter 7 Cablenets and Fabric Structures

7.1 Introduction

7.2 Basic Methods of Shape Finding

7.3 The Grid Method

7.4 Smoothing

7.5 A More Complex Example

7.6 Membrane Finite Element Model

7.7 Patterning

7.8 Computer Programs For Cable Nets And Fabric Structures

7.9 Problems

Chapter 8 Three-Dimensional Beam-Columns

8.1 Introduction

8.2 The Equation of Three-Dimensional Beam-Columns

8.3 The Member Stiffness Matrix

8.4 Numerical Solution

8.5 Special Cases

8.6 Problems
8.5.3 Lateral Buckling 197
8.5.4 A More Complex Case 197
8.5.5 The Effect of Initial Torsion 199
8.6 Problems 203

Chapter 9 Nonlinear Analysis of Shells 205
9.1 Introduction 205
9.2 The Geometric Stiffness Matrix of Triangular Element Shells 206
  9.2.1 In-Plane Contribution of the Triangular Membrane Element 207
  9.2.2 In-Plane Contribution of the Triangular Plate Bending Element 207
  9.2.3 Out-Of-Plane Contribution to the Shell Geometric Stiffness Matrix 210
9.3 Element Pure Deformational Rotations and Translations 214
  9.3.1 Stress Retrieval in the Membrane Finite Element 214
  9.3.2 Stress Retrieval in the Plate Finite Element 215
9.4 Computer Program P16-SHELLNL.FOR 218
9.5 Examples 219
  9.5.1 Example 9.1. Bending of a Cantilever Plate 220
  9.5.2 Example 9.2. Simply Supported Plate 223
  9.5.3 Example 9.3. Analysis of a Shallow Cylindrical Shell 226
  9.5.4 Example 9.4. Leicester's Shallow Spherical Shell 233
  9.5.5 Example 9.5. Mescall's Shallow Spherical Shell 234
  9.5.6 Example 9.6. Open Hemispherical Shell 235
  9.5.7 Example 9.7. Lateral Buckling of an L-Frame 236
9.6 Some Remarks 237
9.7 Problems 237

References 239

Appendix 1 Member Stiffness When Beam-Column Effects are Included 243

Appendix 2 Determinants 247

Appendix 3 The Rotation Matrix 249

Appendix 4 Perturbation Methods Applied to Plane Beams 257

Appendix 5 Introduction to Computer Programs 259
A5.1 Introduction 259
A5.2  Space Trusses  259
A5.3  Plane Frames  260
A5.4  Listing for TR3D.FOR  261
A5.5  Listing for FR2D.FOR  263

Appendix 6  Graphics on a PC  267
A6.1  Introduction  267
A6.2  Plotting in 2-D  268
A6.3  Drawing Lines in 2-D  269

Index  271
