Recent worldwide application of seismic isolation and energy dissipation to steel and other materials structures and conditions for their correct use
A. Martelli, P. Clemente, F. Saitta & M. Forni

Multistorey steel framed building damage from the Christchurch earthquake series of 2010/2011
G.C. Clifton, M. Bruneau, G.A. MacRae, R. Leon & A. Fussell

Responses of tall buildings in Tokyo during the 2011 Great East Japan Earthquake
K. Kasai, W.C. Pu & A. Wada

Seismic performance of steel structures during the 2010 Maule earthquake
R.A. Herrera, J.F. Beltran, C. Aguirre & A. Verdugo
Analytical and experimental methods

Seismic failure analysis of a composite girder bridge
F. Schanack, J.P. Reyes & R. Luco

Cyclic tests of beam-upright connections in racking systems with a new hybrid procedure
L. Calado, C.A. Castiglioni & A. Drei

Development of standard dynamic loading protocol for buckling-restrained braced frames
M. Dehghani & R. Tremblay

Hybrid simulation of a 2-story steel MRF retrofitted with HPFRC infill panels
D.G. Lignos, D.M. Moreno & S.L. Billington

Estimation of the risk amplification in steel buildings subject to seismic actions using Monte Carlo simulation
C.A. Bermúdez, J.E. Hurtado, A.H. Barbat & L.G. Pujades

Effects of low-cycle fatigue on steel moment frames with RBS
A. Amiri, F. Rojas & J.C. Anderson

Reliability-based seismic response transformation factors using Artificial Neural Network
J. Bojórquez, S.E. Ruiz & E. Bojórquez-Mora

Finite element modeling of the inelastic cyclic response and fracture life of square tubular steel bracing members subjected to seismic inelastic loading
A. Roufegarinejad & R. Tremblay

Experimental and analytical modelling of seismic behaviour of braced framed structures with “zipper” mechanism
A.M. Reinhorn & M. Schachter

Application of Endurance Time method in seismic assessment of mid-rise and high-rise steel moment and braced frames
M.A. Hariri Ardebili, Y. Zarringhalam, M. Yahyai & M. Mirtaheri

A finite element approach for modeling bolted top-and-seat angle moment connections
D.J. Ruffley, J.A. Swanson & G.A. Rassati

Study on concentrically V-braced frames under cyclic loading

Computer-based nonlinear analysis method for seismic performance assessment of 3D frameworks
C.G. Chiorean, G. Tarta, G.M. Barsan, Zs. Gobesz & M. Nedelcu

A fast incremental-iterative procedure for ultimate strength analysis and design of composite steel-concrete cross-sections
C.G. Chiorean

Real-time hybrid simulations of a 3-story steel frame building with magneto-rheological dampers subject to strong ground motions
Y. Chae, J.M. Ricles & R. Sause

Seismic evaluation of a braced plan irregular steel structure using hybrid testing
D.P. McCrum & B.M. Broderick

Seismic testing of concentrically braced frame models for the BRACED project
A.D. Hunt & B.M. Broderick
Numerical study on welded beam-to-column joints in hybrid-steel building frames
B. Cermeľ & D. Beg

Cyclic behavior of a new mechanical beam-to-column connection for steel structures
J. Iyama, Y. Fukushima, K. Araki, S. Piao, K. Hirosawa, N. Sato & E. Ohata

Beam-to-column connection for built-up column using ultra-high-strength steel
X. Lin, Y. Chung, T. Okazaki & M. Nakashima

Experimental research on hysteretic behavior of non-diaphragm joint connecting cold-formed steel tube and H-shaped beam
L. Zhang & Y. Chen

Finite element simulation of cyclic flexural behavior for braced frame beam-column connections
C.D. Stoakes & L.A. Fahnestock

Cyclic behavior of welded T-shapes for Double Welded T-connections
M.A. Bravo & R.A. Herrera

Prequalification of two beam-to-column welded moment connections with reduced beam section and with cover plate in beam for steel building applications under the action of dynamic load
C.A. Cerón, G. Areiza & P. Thomson

Cumulative damage models for steel moment frame connections
S.D. Campbell & R.M. Richard

Shim and bolt size effects on the Asymmetric Friction Connection
H.H. Khoo, G.C. Clifton, J.W. Butterworth & G.A. MacRae

Experimental study on mechanical behavior of weld-free steel structure with knee brace damper using square tube column
Y. Koetaka, K. Suita, K. Inoue, N. Uno, Y. Fukuchi & D. Kawai

On bottom steel plate to concrete anchorage in hybrid steel trussed concrete beams
N. Cancelliere, P. Colajanni & L. La Mendola

Control of bolted beam-to-column connections in moment joints by T-stub properties
D. Grecea, N. Muntean & D. Dubina

Seismic behaviour of the diagonal through plate moment connection
S. Torabian, S.R. Mirghaderi & F. Keshavarzi

Study on structural behavior of weldless joint in beam-to-column connection of interior column with knee brace reinforcement
S. Honma, K. Ebato & Y. Harada

Friction T-stub joints under cyclic loads: Experimental behavior
M. Latour, V. Piluso & G. Rizzano
