<i>Foreword by Richard Heinberg</i>	8	all bad. The cake analogy. Echoes of a resilient past. Can we learn anything useful from Britain's last 'wartime mobilisation'?	Education. Economy. Transport. Energy. Housing.
<i>Introduction</i>	12		
<b>TANTALISING GLIMPSES OF RESILIENCE</b>			
<i>Part One:</i>			
<b>THE HEAD</b>			
WHY PEAK OIL AND CLIMATE CHANGE MEAN THAT SMALL IS INEVITABLE			
<i>Chapter 1</i>	18		
<b>PEAK OIL AND CLIMATE CHANGE</b>			
<b>The two great oversights of our times</b>			
What is Peak Oil? Some key indications that we are nearing the peak. Peak when? Climate change. The greenhouse effect. Is there such a thing as a safe limit? The intertwining of peak oil and climate change. Can peak oil engage people more effectively than climate change? The contradictions of the Hirsch Report.			
<i>Chapter 2</i>	44		
<b>THE VIEW FROM THE MOUNTAIN-TOP</b>			
Evaluating possible ways forward. Why a future with less energy ends up looking somewhat inevitable. Why 'Energy Descent'?			
<i>Chapter 3</i>	54		
<b>WHY REBUILDING RESILIENCE IS AS IMPORTANT AS CUTTING CARBON EMISSIONS</b>			
What is resilience? The three ingredients of a resilient system. Life before oil wasn't			
<i>Chapter 4</i>	68		
<b>WHY SMALL IS INEVITABLE</b>			
Relocalisation. The dangers of clinging to the illusion of large scale. Top-down or bottom-up? Where does government fit in?			
<b>SUMMING UP PART ONE</b>	77		
<i>Part Two:</i>			
<b>THE HEART</b>			
WHY HAVING A POSITIVE VISION IS CRUCIAL			
<i>Chapter 5</i>	80		
<b>HOW PEAK OIL AND CLIMATE CHANGE AFFECT US: 'POST-PETROLEUM STRESS DISORDER'</b>			
<i>Chapter 6</i>	84		
<b>UNDERSTANDING THE PSYCHOLOGY OF CHANGE</b>			
An interview with Dr Chris Johnstone. The FRAMES model.			
<i>Chapter 7</i>	94		
<b>HARNESSING THE POWER OF A POSITIVE VISION</b>			
Why visions work. Captain Future – the wizard of science. Visions of abundance.			
<i>Chapter 8</i>	104		
<b>A VISION FOR 2030: LOOKING BACK OVER THE TRANSITION</b>			
Food and farming. Medicine and health.			
<i>Chapter 9</i>	122		
<b>KINSALE – A FIRST ATTEMPT AT COMMUNITY VISIONING</b>			
The Kinsale Energy Descent Action and how it came about. Four lessons from the Kinsale Project. Reflections on the Kinsale process. What's happening now in Kinsale?			
<b>SUMMING UP PART TWO</b>	131		
<i>Part Three:</i>			
<b>THE HANDS</b>			
EXPLORING THE TRANSITION MODEL FOR INSPIRING LOCAL RESILIENCE-BUILDING			
<i>Chapter 10</i>	134		
<b>THE TRANSITION CONCEPT</b>			
The philosophical underpinnings. Six principles that underpin the Transition model. The Project Support Project concept. Issues of scale. The interface between Transition Initiatives and local politics.			
<i>Chapter 11</i>	146		
<b>HOW TO START A TRANSITION INITIATIVE</b>			
The seven 'Buts'. The Twelve Steps of Transition.			
<i>Chapter 12</i>	176		
<b>THE FIRST YEAR OF TRANSITION TOWN TOTNES</b>			
Background and history. Oil vulnerability auditing. Skilling Up for Powerdown.			

# Contents

Totnes, the nut tree capital of Britain. The Totnes Local Food Directory. The Totnes Pound. Transition Tales. TTT Home Groups.			
<i>Chapter 13</i>	202		
<b>THE VIRAL SPREAD OF THE TRANSITION CONCEPT</b>			
Transition Penwith. Transition Falmouth. Transition Town Lewes. Transition Ottery St Mary. Transition Bristol. Transition Town Brixton. Transition Forest of Dean.			
		<b>SOME CLOSING THOUGHTS</b>	212
		<b>APPENDICES</b>	
		<i>Appendix 1: The Oil Depletion Questionnaire</i>	214
		<i>Appendix 2: John Croft's 'Four stages that any project will go through'</i>	215
		<i>Appendix 3: Assignment Sheet – Energy Descent Action Plan</i>	217
		<i>Appendix 4: The Energy Descent Action Plan Process</i>	219
		<i>Appendix 5: How to become a Transition Initiative</i>	220
		<i>Appendix 6: A sample press release</i>	223
		<i>Appendix 7: Transition Training</i>	224

## LIST OF FIGURES

1. A map of the Petroleum Interval	20	7. What happens when you look at peak oil and climate change as two intertwined problems	38	13. The Petroleum Interval in its historic context	70
2. The peak in oil discovery and the widening gap between discovery and production	21	8. Spectrum of post-peak scenarios	46	14. Top-Down and Bottom-Up responses	75
3. Production of conventional oil	27	9. Four Energy Scenarios	48	15. The Stages of Change Model	85
4. The impending gap opening up between supply and demand	29	10. Energy Return on Energy Invested for the range of energy sources	51	16 & 17. Creating a Project board game	97
5. A time-series of monthly average sea ice extent from August 1979 to August 2007	34	11. The carbon footprints for the same energy sources as grams of CO <sub>2</sub> per kilowatt-hour	52	18. How the Transition approach is distinct from other environmental approaches	135
6. Comparing actual Arctic sea ice summer extent loss with IPCC projections	35	12. Adding resilience leads to a re-examination of what might be best practice	62	19. A model example of an Open Space open agenda	168

## FINDING 'TOOLS FOR TRANSITION' BOXES

1. The self-teaching peak oil talk	26	5. Post-peak tour guides	101	9. Designing productive meetings	164
2. The Web of Resilience exercise	60	6. Using visioning as a tool in peak oil education in schools	118	10. How to run an Open Space Event	168
3. The humble potato becomes a tool for breaking our oil addiction: an exercise	90	7. Making the most of your public events	154	11. How to run a fishbowl discussion	173
4. The Board Game – a tool for identifying your vision and making it real	96	8. Writing a good Press Release	160	12. Running a World Café Event	184
