SELECTED ARTISTS	xiii
SELECTED TECHNOLOGIES	xvii
SERIES FOREWORD	xix
FOREWORD BY JOEL SLAYTON	xxi
PREFACE	xxiii
1 Introduction, Methodology, Definitions, and Theoretical Overview	1
1.1 ART AND SCIENCE AS CULTURAL ACTS	2
A Quiz	4
Revisiting the Relationship of Art and Techno-Scientific Research	5
Organization of the Book	7
The Deficiency of Categorization	8
What Areas of Technological Art Are Included? Which Are Not?	9
Definitions and Theoretical Reflections	11
Similarities and Differences between Science and Art	18
Critical Theory and Problematic Issues in the Integration of Art and Techno-Scientific Research	20
Artists' Stances in Integrating Research	25
Summary: The End of Timelessness?	30
1.2 ELABORATION ON THE APPROACH OF ART AS RESEARCH	34
Can the Arts Offer Alternatives in Setting Research Agendas, Interpreting Results, and Communicating Findings?	35
What Is a Viable Role for Artists in Research Settings? What Can Researchers Contribute to Art and What Can Artists Contribute to Research? What Can High-Tech Companies Gain from Artists Being Involved?	36
Art Characteristics Useful for Research	38
Preparing Artists for Research	39

The Integration of Research and Art	40
Art and Science/Technology Collaborations	41
Future Possibilities	48
2 Biology: Microbiology, Animals and Plants, Ecology, and Medicine and the Body	53
2.1 BIOLOGY: RESEARCH AGENDAS AND THEORETICAL OVERVIEW	54
Introduction	55
Research Agendas in Biology and Medicine	56
Areas of Cultural Significance in Biological Research	59
Theoretical Perspectives on Biology and the Body	72
Rethinking the Body and Medicine	77
Searching for Aesthetic Form in Art and Science	84
How Are Biology-Based Theory and Research Important to the Arts?	88
2.2 ARTISTS WORKING WITH MICROBIOLOGY	94
Introduction: Microbiology and Genetics as Artistic Interest	95
Manipulations and Investigations of the Microworld	96
Creating Forms and Visualizations Based on Its Structures, Including the New Iconography of Gene Mapping	101
Reflections on the Processes of Genetic Science and Its Social Implications	105
Summary: Micro Steps	108
2.3 PLANTS AND ANIMALS	110
Introduction	111
Invertebrates	112
Arthropods: Insects and Spiders	116
Plants	118
Vertebrates	120
Acoustic Ecology	123
Summary	126
2.4 ECOLOGICAL ART	128
Ecology: Organic Life as a System	129
Questions Raised by Artistic Interest in Ecology	130
Historical Examples of Artistic Work	131
Contemporary Artistic Work with Ecological Concepts	133
Summary: Linking Science and Art in Action	146
2.5 BODY AND MEDICINE	148
Introduction: Bodies, Technology, and Theory	149
Extropian and Post-Human Approaches	154

Artists' Experiments with Technological Stimulation	157
Artists' Experiments with Smell	169
Artists' Experiments with Surgery	170
Experiments with Tissue Culture	174
Body Modification	174
Brain Processes, Heartbeats, Breath, Biosensors, and Psychology	180
The Psychological Processes of Perception, Cognition, Appreciation, and Creativity	189
Body Imaging	189
Medicine, Hospitals, Bodily Fluids, and Death	193
Summary: Dissecting the Body	198
3 Physics, Nonlinear Systems, Nanotechnology, Materials Science, Geology, Astronomy, Space Science, Global Positioning System, and Cosmology	201
3.1 PHYSICAL SCIENCE RESEARCH AGENDAS AND THEORETICAL REFLECTIONS	202
Introduction: Questions about the Biggest and Smallest of Things	203
Survey of Research Fields and Agendas	204
Nonlinear Systems, Chaos, and Complexity	207
Astronomy, Cosmology, and Space Science	209
Epistemology—How Do We Know What We Know?	211
Potentially Important Emergent Technologies	213
Summary: Artist Explorations of Physical Science Research and Concepts	221
3.2 ATOMIC PHYSICS, NANOTECHNOLOGY, AND NUCLEAR SCIENCE	222
Atomic Physics	223
Viewing and Manipulating the Atomic World—Nanotechnology	226
Nuclear Science	230
Summary: Difficulties of Working at the Atomic Level	233
3.3 MATERIALS AND NATURAL PHENOMENA: NONLINEAR DYNAMIC SYSTEMS, WATER, WEATHER, SOLAR ENERGY, GEOLOGY, AND MECHANICAL MOTION	234
Nonlinear Systems	235
Natural Phenomena—Oceans, Water, and Moving Liquid	239
Natural Phenomena—Erosion and Geological Action	241
Natural Phenomena—The Sky, Winds, and Weather	244
Solar Art	246
Mechanics—Oscillation and Pendulum Action	251
Fire, Heat, Magnetics, and Electromagnetics	253
Materials Science, Rapid Prototyping, and Chemistry	253
Summary: Pattern Finding and Poetry of Matter	256

3.4	SPACE	260
	Artistic Interest in Space	261
	Views from Space	263
	Art Viewed from Earth	265
	Art Executed in Space and Weightlessness	268
	Painting and Photography Based on Space Exploration	271
	Conceptual and Electronic Works	271
	Search for Extra Terrestrial Intelligence (SETI)	275
	Art Critiques of Space Research	278
	Summary: The Hopes	279
3.5	GLOBAL POSITIONING SYSTEM (GPS)	282
	Possibilities and Dangers	283
	Artistic Experimentation with GPS	283
	Summary: Unexpected Implications	292
4	Algorithms, Mathematics, Fractals, Genetic Art, and Artificial Life	295
4.1	RESEARCH AGENDAS IN MATHEMATICS AND ARTIFICIAL LIFE	296
	Why Is Mathematics Part of a Book on Science, Technology, and Art?	297
	A Review of Research Agendas in Mathematics	298
	Artificial Life	302
	Theoretical Perspectives on A-Life	305
	Summary	311
4.2	ALGORITHMIC ART, ART AND MATHEMATICS, AND FRACTALS	312
	Algorithmic Art	313
	Art and Mathematics	320
	Fractals	330
	Promise and Problems in Art and Mathematics and Algorithmic Art	333
	Literacy—Audience Background	334
	Understanding Systems	336
	Abstraction and Cultural Theory	337
4.3	ARTIFICIAL LIFE AND GENETIC ART	340
	A-Life Sculpture and Autonomous Agents	341
	Genetic, Evolutionary, and Organic Art	351
5	Kinetics, Sound Installations, and Robots	367
5.1	ROBOTICS AND KINETICS	368
	Introduction: Robots—Creatures of Art and Science	369
	An Overview of Scientific and Technological Research Agendas	371

Examples of Conceptual Challenges and Approaches	374
Robots and Popular Culture	382
Summary: Robot Hopes, Fears, and Realities	383
5.2 CONCEPTUAL KINETICS AND ELECTRONICS	386
Artistic Research	387
Kinetic Art Precursors	388
Kinetics and Light Sculpture	389
Conceptual Kinetics	392
Summary: More Than Robotics	405
5.3 KINETIC INSTRUMENTS, SOUND SCULPTURE, AND INDUSTRIAL MUSIC	406
A Brief Theoretical Overture	407
Experiments in Sound Installation	409
Summary: Research as Art	422
5.4 ROBOTS	424
Robotic Theater and Robotic Dance	425
Autonomy	427
Extreme Performance, Destruction, Mayhem, and Control	432
Social Metaphors	440
Extending Robot Motion and Interfaces	446
Robot Architecture	451
Summary: Kinetics and Robots—Hybrids of Art and Science	454
6 Telecommunications	457
6.1 TELECOMMUNICATIONS RESEARCH AGENDAS AND THEORETICAL REFLECTIONS	458
Introduction: Overcoming Distance	459
Telecommunications Research and Development	460
Research Trends in Telepresence	469
The Meaning of the Telecommunications “Revolution”	473
The Exploration of New Possibilities	481
Summary: Telecommunications—The Grand Cyber Debate	484
6.2 TELEPHONE, RADIO, AND NET.RADIO	486
A Brief History of Telematic Art	487
Theoretical Perspectives on Telephone Art	488
Examples of Telephone-Based Art	490
Radio, Television, and Wireless	497
Radio-Based Art and Theater Installations	503
Art Radio	504

The Migration to Net.Radio	507
Summary: Dangers and Opportunities in Convergence	511
6.3 TELECONFERENCING, VIDEOCONFERENCING, SATELLITES, THE INTERNET, AND TELEPRESENCE	514
Teleconferencing, Videoconferencing, Satellites, and Internet Collaboration	515
Telepresence Definitions	526
Artists Exploring Telepresence	528
Visualizing Net Activity	549
Parapsychological Communication	554
Summary: Being There	556
6.4 WEB ART	558
Critical Perspectives on Web Art	561
Archive and Information Sites	564
Projects to Accumulate Web-Viewer Opinions	572
Genetic Art Using Web-Visitor Voting	573
Recomposing Web Resources	576
Collaborative Environments and Person-to-Person Communication	579
The Development of New Capabilities	585
Reflections about the Net	589
Arrangements That Use Readings of the Physical World to Affect the Web	596
Cool Sites	599
Summary: The Web as an Art Arena	600
7 Digital Information Systems/Computers	603
7.1 RESEARCH AGENDAS AND THEORETICAL OVERVIEW	604
Introduction: The Computer Revolution	605
Diverse Histories of Technological Imagination	605
Research Agendas	607
Theoretical Reflections on the Digital Culture and Art	630
Summary: Debate in the Art Community—Possibilities of an Enhanced Future	657
7.2 COMPUTER MEDIA	664
Introduction: Extensions of Photography, Cinema, Video, and Literature	665
Deconstructive and Feminist Critiques of Cultural Trends	666
Extending Poetic and Expressive Capabilities	671
Art Games	676
Multi-Person Events	679
Video Installation	680

Interactive Documentary	685
Hyperfiction	688
Summary: Computer Media—The Next Stages of Cinema and Television?	689
7.3 VIRTUAL REALITY	692
Introduction: Artists as Architects of Virtual Reality	693
Unorthodox Spaces and Characters	694
The Virtual Reality World as Metaphor	705
Alternative Objects and Creatures	709
Relationships between the Physical and the Virtual	712
Information Visualization	717
Distributed Virtual Reality	721
Virtual Reality, Music, and Theater	722
Research and Commercial Virtual Reality Environments	725
Summary	726
7.4 MOTION, GESTURE, TOUCH, GAZE, MANIPULATION, AND ACTIVATED OBJECTS	728
Introduction: Reworking the Interface	729
Motion	730
Gesture	745
Touch and Tactility	749
Gaze	755
Face Recognition	758
Complex Actions—Balance, Walking, and Bicycling	760
Breath	764
Activated Objects	764
Summary: Can a Computer Do More Than See and Hear?	772
7.5 SPEECH SYNTHESIS, VOICE RECOGNITION, AND 3-D SOUND	774
Sound Research	775
3-D Sound	776
Speech Synthesis and Manipulation	780
Speech Recognition	782
Summary: Something to Talk About	784
7.6 ARTIFICIAL INTELLIGENCE	786
Artificial Intelligence Research	787
Algorithms for Creativity	789
Image and Speech Recognition	794
Interactions with Artificial Characters	797

Affective Computing	804
Agents	806
Summary: The Role of the Arts in Artificial Intelligence and Agent Research	809
7.7 INFORMATION AND SURVEILLANCE	812
Information Management, Visualization, Commerce, and Surveillance	813
Bar Codes and ID Technologies	814
Surveillance	815
Databases and Research Processes	822
Information Visualization	829
Reflections on Science	833
Information Organizations and Structures	836
Summary: Being Formed by Information	846
8 Resources	849
8.1 EXHIBITIONS AND FESTIVALS; EDUCATIONAL PROGRAMS; ART, AND RESEARCH COLLABORATIONS; ORGANIZATIONAL RESOURCES, THINK TANKS, AND WEB RESOURCES	850
Permanent Spaces, Museums, and Comprehensive Institutions	851
Competitions and Festivals	857
Organizations and Information Publishers	860
Art and Science-Technology Sponsors, Competitions, and Academic Convergence Programs	865
Think Tanks and University Labs	866
Educational Resources	868
Research Conferences, Science Magazines, Trade Magazines, and Science and Technology Studies	872
Summary: Institutions as Art	873
8.2 SUMMARY—THE FUTURE	874
Appendixes	879
A METHODOLOGY	880
B BOOKS FOR FURTHER INQUIRY	886
NAME INDEX	905
SUBJECT INDEX	923
