FOREWORD xiii

ACKNOWLEDGMENTS xvii

ABBREVIATIONS xix

Chapter 1	Introduction	1
	Textbook Objectives and Structure	1
	User's Guide	4
	Why Bother About Cities and Sustainability?	4
	<i>The World and Its Environmental Concerns Are Urbanizing</i>	7
	<i>Range and Severity of Urban Environmental Problems</i>	9
	<i>Cities as Solutions</i>	20
	Summary of Conclusions and Recommendations	21

PART I	Cities and Sustainability	25
---------------	----------------------------------	-----------

Chapter 2	Thinking About the Urban Environment	27
	The Environment in Urban Literature	28
	Cities in Environmental Theory	30
	Synthesis	33
	<i>Thinking About Urban Ecology</i>	33
	<i>Sustainable Development</i>	39
	<i>The Earth Summit, Local Agenda 21, and Habitat II</i>	42
	Other Theoretical Perspectives	47
	Theoretical Issues	49

Chapter 3	Understanding Problems, Characteristics, and Underlying Causes	59
	Key Problem Areas	60
	<i>Access to Environmental Infrastructure and Services</i>	61
	<i>Pollution from Urban Wastes and Emissions</i>	63
	<i>Resource Degradation</i>	68
	<i>Environmental Hazards</i>	70
	<i>The Global Dimension</i>	72
	Conditions Influencing the Urban Environment	73
	<i>Economic Factors</i>	74
	<i>Demographic Factors</i>	80
	<i>Natural and Spatial Factors</i>	81
	<i>Institutional Setting</i>	85
	Underlying Causes of Urban Environmental Degradation	89
	<i>Lack of Public Awareness and Participation</i>	90
	<i>Inadequate Governance</i>	92
	<i>Poor Policies</i>	94
	<i>Insufficient Knowledge</i>	96
	<i>Applying the Framework: Slums in Turkey</i>	97
Chapter 4	Can Urban Development Be Sustained?	105
	Differing Views of Urban Sustainability	105
	<i>Minimizing Ecological Footprints</i>	106
	<i>Sustaining the Production of Wealth</i>	109
	<i>Reducing Key Environmental Impacts</i>	113
	<i>Common Ground and Common Challenges</i>	116
	Applying Definitions of Urban Sustainability to Case Studies	118
	<i>Las Vegas, Nevada</i>	118
	<i>Mexico City, Mexico</i>	122
	Are Cities Sustainable?	126
	The Case for Urban Environmental Planning and Management	131
PART II	Planning to Sustain Cities	135
Chapter 5	The LEAP: A Framework for Urban Environmental Planning	137
	Styles of Urban Environmental Planning	137
	<i>Reactive Approaches</i>	138
	<i>Moving Toward a Strategic Approach</i>	141
	<i>The Strategic Alternative of Local Environmental Action Planning</i>	143

Informed Consultation	145
<i>Clarifying Issues</i>	145
<i>Involving Stakeholders</i>	146
<i>Setting Priorities and Objectives</i>	153
LEAP Development	154
<i>Identifying Options</i>	155
<i>Selecting and Integrating Solutions</i>	156
<i>Action Planning</i>	159
LEAP Implementation	160
<i>Initiating Projects, Policies, and Programs</i>	161
<i>Institutionalizing the Planning Process</i>	162
<i>Monitoring and Indicators</i>	164
Some Procedural Considerations	168
Applying the Framework	171
<i>Sustainable Cities Program (SCP)</i>	171
<i>Local Agenda 21 Initiative (LA21)</i>	172
Chapter 6 Tools for Analysis and Planning	177
Analytical Tools	178
<i>Data Collection, Citywide Indicators, and Ecological Footprints</i>	179
<i>Health Evaluation</i>	185
<i>Economic Valuation</i>	189
<i>Household and Community Techniques</i>	192
<i>Geographic Information Systems</i>	195
Planning Tools That Use Analysis and Public Consultation	196
<i>Rapid Urban Environmental Assessment</i>	197
<i>Comparative Risk Assessment</i>	197
<i>Using Several Tools Over Time</i>	200
Tools and Processes: A Suitability Summary	201
Chapter 7 The LEAP Process in Action	211
Informed Consultation	212
<i>Examples</i>	212
<i>Lessons</i>	215
LEAP Formulation	220
<i>Experience</i>	220
<i>Lessons</i>	233
LEAP implementation	234
<i>Experience</i>	234
<i>Lessons</i>	241

PART III	Managing to Sustain Cities	249
Chapter 8	Choosing Appropriate Management Options	251
	Management Instruments and Selection Criteria	252
	Options for Involving Stakeholders	259
	<i>Transparency and Awareness</i>	260
	<i>Participation of Civil Society</i>	262
	Options for Building Environmental Management Capacity	267
	<i>General Measures for Capacity-Building</i>	267
	<i>Improving Municipal Operations</i>	271
	Introducing New Institutions and Systems	281
	Compendium of Management Options	284
Chapter 9	Good Practice for Managing the Urban Environment	293
	What Is Good Practice?	294
	International Level: Global Campaign to Reduce Greenhouse Gas Emissions	296
	National Level: Phasing Out Lead Gasoline	301
	City Level: Integrating the Environment in Urban Development	305
	Sectoral Level: Matching Sanitation Services and Socioeconomic Status	330
	Neighborhood Level: Preserving an Informal Community's Role in Waste Management	335
	Compendium: 200+ Examples of Good Practice	341
Chapter 10	The Frontiers: Conclusions and Conundrums	359
	Principles for Sustaining Urban Development in the Twenty-First Century	359
	Practical Lessons Learned for Planning and Managing	361
	Tensions and False Dichotomies	363
	What We Still Need to Know	366
	<i>Research for Planning</i>	368
	<i>Research for Management</i>	370
	A Concluding Note	372

Annex A	Environmental Data for the World's 35 Largest Cities	377
Annex B	Resources for the Urban Environment	381
	Information	381
	Networks and Associations	390
	Financial and Other Assistance	394
Annex C	Training and Research Institutions	399
	Training	399
	Research	402
	INDEX	405
