11	Acknowledgement		
13	Introduction		

## EXPLORATION OF THEMES

---

[1]		[7]	
19	<b>INTRODUCTION TO DYNAMIC DAYLIGHTING ARCHITECTURE</b>		
20	Energy Saving Potential	355	The Vision
24	Contemporary Architectural Examples with Daylight-Deflecting Systems	356	Examples in the History of Architecture

---

[2]		[7]	
51	<b>BASIC PRINCIPLES OF DAYLIGHT TECHNOLOGY</b>		
52	The Movement of the Sun	363	The Light Dynamic Interior
66	Daylight in Urban Planning	365	Daylight, Psychology and Physiology
72	State of Technology	372	Alterations in Climate
76	Material Science	373	The "Sun Experience" in Urban Spaces
80	Daylight Deflection – Functions and Systems	376	State of Technology in Solar Architecture
85	Protective and Supply Function	379	Technologies for Optical Daylight Modulation
90	Light-Deflection and Light-Conducting Systems	382	Basic Principles of Daylight Deflection
92	Basic Terms of Lighting Technology	384	Daylight Deflection Systems
100	Building Physics	386	Requirements for Translucent Building Elements
108	g-Value Measurements of Retro-Systems	388	Visual Comfort
112	Economic Efficiency	392	Thermal Comfort
		395	Visual and Thermal Comfort

---

[3]		[7]	
115	<b>SYSTEMS OF LIGHT GUIDANCE</b>		
116	Light Deflection Using Prisms	399	Technologies of Daylight Deflection
120	Holographic Light-Deflection	399	Systems Using Prismatic Panes and Films
122	Light Deflection with Glass Mirror Louvers		

---

124	Light-Deflection with Transparent Insulating Systems	402	Prismatic Profile Rods in Insulating Glass
128	Mirroring Louvers	403	Light Deflection Using Holograms
131	Light-Shelves	405	Light-Conducting Systems
134	Optical Mirroring Systems	406	Transparent Insulation
		407	Switchable Layers
		409	Optimal Daylight Deflection, Requirements
		412	Light-Deflecting and Shading Products Using Reflector and Louver Systems

[4]

145	<b>THE NEW RETRO-TECHNOLOGY</b>
146	RETROLux <i>Exterior</i>
148	RETROLux <i>Interior</i>
188	RETROLux in Roofing
194	RETROLux <i>Therm</i>
220	RETROFlex
244	RETROFlex <i>Therm</i>
260	System Comparison
268	Visual Comfort
282	Retro-Technology as Transparent Insulation

[7]

421	RETROLux
423	Technological Aspects of Retro-Systems
426	Calculating Curves of Luminous Intensity Distribution
427	Dynamic Qualities of RETROLux
428	RETROLux in Flat and Inclined Roofing
428	Integrated Within Insulating Glass: RETROLux <i>Therm</i>
429	RETROFlex
431	RETROFlex <i>Therm</i>
432	System Advantages of Retro-Technology

[5]

285	<b>NIGHT-TIME ARCHITECTURE</b>
286	Use of Daylighting Components
288	Architectural Examples
306	Facade-Integrated Lighting – RETROLight

[7]

437	Integrating Daylight and Artificial Lighting
438	RETROLight
439	RETRO <i>Top</i>
440	Transom Luminaires

- 318 Integral Light and Ceiling Technology –  
RETRO*Top*
- 326 Space-Connecting Lighting Technology –  
Transom Luminaire
- 

**[6]**

- 333 **INTEGRATED SYSTEMS**
- 334 Synergy of Light and Climate
- 336 Synergy in the Facade
- 

**[7]**

- 443 Integrated Planning
- 

449 **APPENDIX**

- 450 About the Author
- 451 Patents Held by Köster
- 451 Regulatory Guidelines
- 452 Bibliography
- 453 Picture Credits
- 454 List of Architects
- 455 List of Manufacturers
- 456 The Deutsche Bundesstiftung Umwelt  
(DBU)
- 458 Company Profiles
- 462 Index
