PREFACE TO THE SECOND EDITION	XII
ACKNOWLEDGMENTS	XV
1 Introduction	1
The need for change	2
A new era of sustainability planning	13
Levels of government and scales of planning	16
Recent trends in planning and design	18
Part One: The nature of sustainability planning	23
2 Sustainable development	25
Roots of the concept	25
Definitions and perspectives	30
Modernist, postmodernist, and ecological worldviews	33
The role of values and institutions	38
3 Theory of sustainability planning	41
Elements of the sustainability planning approach	41
Past perspectives on planning	52
Situating sustainability planning within planning theory	60
4 Sustainability planning and the "Three Es"	63
Sustainability and the environment	64
Sustainability and economics	65
Sustainability and equity	70
5 Sustainability planning in practice	77
Understanding context	77
Establishing priorities	80

Thinking strategically	82
Working collaboratively	83
Evaluating progress	84
Pushing the envelope	84
6 Tools for sustainability planning	86
Planning processes	86
Sustainability indicators	93
Standards, benchmarks, and green rating systems	95
Ecological footprint analysis	97
Carbon calculators	98
GIS and mapping	99
Environmental assessment and reporting	99
Institutions and policy mechanisms	100
Education, communication, and consensus-building	103
Organizing and coalition-building	103
Part Two: Issues central to sustainability planning	105
7 Climate change planning	107
The framework of climate planning	107
Mitigation: reducing emissions	109
Adaptation: living with change	111
The challenge of changing behavior	115
8 Energy and materials use	117
Sustainable energy use	118
Sustainable materials use	121
Lifestyle change	125
9 Environmental planning	126
Environmental protection	126
Environmental restoration	129
Environmental education	132
10 Land use and urban growth	136
The compact city model	137
Urban form values	138
Tools for managing growth	143
The challenge of infill	153
11 Urban design	155
Urban design values	155
Ecological design	158

12	Transportation	163
	Modes of travel	164
	Land use	171
	Pricing	171
	Rethinking mobility	172
13	Housing, food, and health	174
	Housing	174
	Food systems	178
	Healthy environments	179
14	Green architecture and building	184
	Zero-net-energy buildings	185
	Green building materials	187
	Use of natural forms, flows, and materials	192
	Green building programs and standards	193
	Meeting social needs at the building scale	194
15	Social equity and environmental justice	198
	A just sustainability	199
	Environmental justice	203
	Climate justice	204
16	Economic development	205
	Rethinking the growth economy	205
	A local and regional focus	208
	Public control of capitalism	209
17	Population	212
	IPAT revisited	212
	A sustainable level	213
	Planning to stabilize population	214
18	Governance and social ecology	216
	Functional democracy	217
	Vision	219
	Public understanding and participation	220
	Part Three: Scales of planning	223
19	International planning	225
	Who plans at an international scale?	225
	International planning issues	234
	Sustainability issues in industrialized vs. less-developed countries	235

20	National planning	240
	Who plans at a national scale?	241
	National sustainability frameworks	244
	National planning issues	251
21	State and provincial planning	253
	Who plans at the state or provincial scale?	254
	State or provincial planning issues	255
22	Regional planning	262
	Types of region	263
	Who plans regions?	267
	Regional sustainability issues	270
23	Local planning	284
	Who plans at the local level?	285
	Local sustainability issues	287
	Local sustainability and climate change plans	288
24	Neighborhood planning	291
	Who does neighborhood planning?	292
	Neighborhood sustainability issues	294
25	Site planning	325
	Who plans at the site and building scale?	325
	Sustainable site design issues	328
	Economics and sustainable building	333
	Part Four: Conclusion	335
26	How do we get there from here?	337
	Developing an awareness of opportunities	338
	Taking a strategic perspective	340
	Dealing with power and improving democracy	341
	An agenda for the future	343
	NOTES	345
