	<b>ACKNOWLEDGEMENTS</b>	vii
	<b>INTRODUCTION</b>	ix
	<b>PART 1: THE ROLE OF LIGHT IN ARCHITECTURE</b>	1
1	The role of light in architecture	3
1.1	Spectacular vernacular	5
1.2	Light and shade – revealing form	9
1.3	Structure and light – letting the light in	11
1.4	Enlightenment and reason	14
1.5	Sculpting with light	15
1.6	Painting with light	17
1.7	Technology comes of age	19
1.8	Man versus nature	21
1.9	Modern masters of light	23
1.10	Summary	25
	<b>PART 2: DAYLIGHTING DESIGN</b>	27
2	Climate and context	29
2.1	The sun and sky	31
2.2	Daylight strategies and building function	38
2.3	Summary	40
3	Building form and the potential for daylighting	41
3.1	The plan and section	43
3.2	Orientation and obstructions	45
3.3	Atria, lightwells, courtyards and galleria	47
3.4	Summary	52
4	The daylight design of spaces	53
4.1	Transition and differentiation	54
4.2	The components of daylight	58
4.3	The configuration of windows	63
4.4	Daylight modelling techniques	73
4.5	Summary	78
5	Refurbishment of existing buildings	79
5.1	Daylighting options	80
5.2	Summary	86
6	Materials, surfaces, light and colour	87
6.1	Reflection, transmission and absorption	89
6.2	Light and colour	92
6.3	The specification of colour	96
6.4	Colour in architecture	99
6.5	Subjective effects of colour	102
6.6	Summary	104

7	<b>The design of windows</b>	105
7.1	Thermal properties	107
7.2	Shading design	109
7.3	Acoustic performance of windows	119
7.4	Summary	120
8	<b>Artificial lighting controls</b>	121
8.1	Control types	123
8.2	Daylight and energy	128
8.3	Summary	134
9	<b>Advanced daylighting systems</b>	135
9.1	The functions of a daylighting system	138
9.2	A general design procedure for daylighting systems	140
9.3	Reflectors and lightshelves	151
9.4	Integrated window elements	156
9.5	Light-guides	161
9.6	Summary	164
10	<b>Daylight, comfort and health</b>	167
10.1	Visual comfort	169
10.2	Daylight and health	181
10.3	Summary	187
	<b>PART 3: DESIGN CRITERIA AND DATA</b>	189
11	<b>Design tools</b>	191
11.1	Manual tools	193
11.2	Computer-based analytical tools	195
11.3	Computer-based image solution tools	197
11.4	Physical models and artificial skies	199
11.5	Practical df measurement procedures for fixed skies	205
11.6	BRE daylight protractors and ERC nomogram	207
11.7	Sunpath diagrams	212
12	<b>Design data</b>	219
12.1	Building codes, daylight standards	220
12.2	Daylight availability	222
12.3	Photometric data for materials	225
12.4	Light source and luminaires	229
13	<b>Post-occupancy evaluation</b>	231
13.1	Types of POE study	232
13.2	POEs for daylight	234
	<b>ANNOTATED BIBLIOGRAPHY</b>	237
	<b>GLOSSARY</b>	241
	<b>INDEX</b>	245
