

# Contents

8	<b>Foreword by Peter Walker</b>	108	<b>Landscape Stabilization</b>
12	<b>Introduction</b>	109	Soil
18	<b>History of Site Grading</b>	112	Erosion and Landslides
19	Developments in Plan Representation	114	Embankment Angle and Construction Technology
25	Selected Projects	115	An Overview of Slope Stabilization Construction Techniques
26	The Pueblo Grande Ball Court	116	Bioengineering Construction Methods
29	The Pyramids of the Branitz Landscape Park	117	Soil Protection Techniques
35	The "Poet's Garden" at the G 59 in Zurich	118	Ground Stabilization Techniques
39	The Olympiapark in Munich	120	Stabilization Using Lime and Cement
45	Irchel Park Zurich	122	Reinforced Earth
50	Landform at the Scottish National Gallery of Modern Art in Edinburgh	124	Geotextiles
58	<b>Landform</b>	125	Retaining Walls
68	<b>The Basics of Site Grading</b>	125	Cantilevered Retaining Walls
69	Small and Large Scale	125	Gravity Retaining Walls
71	Slope	128	Gabions
71	Slope Calculations in Percent	130	Stone Block Walls
72	Ratio	130	Pre-cast Element Retaining Walls
72	Angle of Incline	130	Natural Stone Retaining Walls
73	Gradient Formations	132	<b>Grading Roads and Parking Spaces</b>
75	Interpolation	133	Grading and Roads
77	Spot Elevations	133	Technical Basics
78	Contour Lines	139	Grading and Parking Spaces
84	Embankments	139	Terms
85	Profile	140	Arrangement and Dimensions
87	Cut and Fill Calculations	140	Horizontal Layout
87	Volume Calculations Using Profiles	141	Vertical Layout
88	Volume Calculations Using Contour Lines	142	Borders
88	Calculating Volume with Triangular Prisms	142	Planting
90	Grading: Purpose and Techniques	143	Handicapped Parking
90	The Purpose of Site Grading	143	Parking Lots in Overview: Tables, Calculation Basics, Layout
94	Important Criteria	152	<b>Grading and Stormwater Management</b>
95	Minimum and Maximum Slopes	153	Stormwater Management Basics
95	Site Grading and Architecture	160	Workflow and Calculations for Stormwater Management
96	Approach to a Grading Plan	160	1. Optimization
102	Grading and Layout Plan	161	2. Water infiltration is not possible in the following cases

162	3. Calculating Stormwater Runoff
163	4. Sizing Debris Traps, Box Gutters, Manholes, and Pipelines
168	5. Infiltration Test to Determine the Specific Infiltration Rate (IR <sub>spec</sub> )
170	6. Sizing the Infiltration System
177	7. Calculating the Required Capacity

## 178 **landscapingSMART and Digital Terrain Modeling**

181	Data Bases and Data Collection
184	Small-Scale Data Collection and Staking Out Work
186	Wooden Pegs and Batten Profiles
188	Digital Terrain Models
193	Cloud Services
195	Analog models
195	History
195	Sand Models
197	Digital Models
197	Real-time Models

## 200 **Grading and 3D Machine Control Systems**

201	GNSS and DGPS
203	How 3D Machine Control Works
208	DTM Processing for 3D Machine Control Systems
209	The Requirements a DTM Must Fulfill to Be Applied by the Construction Company
209	Site Surveys / Basic Data
209	Interchange Format
209	Alignment
209	DTM "Surface Covering"
209	DTM "Subgrade"
210	Curbs
210	Road Construction Projects
210	Engineering Structures
211	Excavation Work
211	Lines and Pipes

## 212 **Terrain Modeling and Construction Machinery**

215	Machinery for Soil Excavation and Loading
219	Machinery for Soil Transportation
221	Machinery for Soil Compaction
222	Construction Machines for "Rainbowing"

## 224 **Grading in Practice**

226	Ertingen-Binzangen Flatbed Glide, Geitz und Partner GbR Landschaftsarchitekten
230	Erlentor Stadthof, Basel, Westpol Landschaftsarchitektur
232	Swiss Cottage Open Space, London, Gustafson Porter
236	Northumberlandia, Cramlington, Charles Jencks and the Banks Group
240	SGI/Google Corporate Headquarters, Mountain View, SWA
242	Desert Ridge Marriot, Phoenix, SWA
244	2500 Hollywood Way, Burbank, SWA
246	Qiaoyuan Wetland Park, Tianjin, Turenscape Landscape Architects
248	Victorian Desalination Project, Victoria, ASPECT Studios
250	Millenium Parklands, Sydney, PWP Landscape Architecture

## 252 **Appendix**

253	Exercises in Grading
275	Glossary
281	Literature / Sources
284	Illustrations
285	Biographies
