	<i>Acknowledgments</i>	xviii
1	Linking spatial cognition and spatial perception	1
	<i>Postscript.</i> Some terms and concepts used in the discussion of spatial cognition and perception	19
	FRANCINE L. DOLINS AND ROBERT W. MITCHELL	
Part I		
	What do animals know and how do they represent external space?	33
2	Psychology and the philosophy of spatial perception: a history, or how the idea of spatial cognition in animals developed	35
	ROBERT W. MITCHELL AND FRANCINE L. DOLINS	
3	Common principles shared by spatial and other kinds of cognition	54
	KEN CHENG	
4	To be buried in thought, lost in space, or lost in action: is that the question?	75
	EMIL W. MENZEL, JR.	

Part II**Perception and memory of landmarks: implications for spatial behavior and cognition** 97

- 5 The encoding of geometry in various vertebrate species 99
CATHERINE THINUS-BLANC, VANESSA CHABANNE, LUCA TOMMASI, PATRICK PÉRUCH AND JACQUES VAUCLAIR
- 6 The visually guided routes of ants 117
TOM COLLETT AND PAUL GRAHAM
- 7 The role of landmarks in small- and large-scale navigation 152
SUSAN D. HEALY AND VICTORIA A. BRAITHWAITE
- 8 Examining spatial cognitive strategies in small-scale and large-scale space in tamarin monkeys 180
PAUL A. GARBER AND FRANCINE L. DOLINS
- 9 Spatial learning and foraging in macaques 197
CHARLES MENZEL

Part III**Evolutionary perspectives on cognitive capacities in spatial perception and object recognition** 211

- 10 The evolution of human spatial cognition 213
THOMAS WYNN
- 11 Egocentric and allocentric spatial learning in the nonhuman primate 237
LUCIO REHBEIN, STEVE SCHESSLER, RONALD KILLIANY AND MARK B. MOSS
- 12 Does echolocation make understanding object permanence unnecessary? Failure to find object permanence understanding in dolphins and beluga whales 258
ROBERT W. MITCHELL AND ESMÉ HOBAN

- 13 Multimodal sensory integration and concurrent navigation strategies for spatial cognition in real and artificial organisms 281
ANGELO ARLEO AND LAURE RONDI-REIG

Part IV

Does mapping of the body generate understanding of external space? 321

- 14 Movement: the generative source of spatial perception and cognition 323
MAXINE SHEETS-JOHNSTONE
- 15 Understanding the body: spatial perception and spatial cognition 341
ROBERT W. MITCHELL
- 16 The evolution of parietal areas involved in hand use in primates 365
LEAH KRUBITZER AND ELIZABETH DISBROW
- 17 Body mapping and spatial transformations 422
SARAH H. CREEM-REGEHR
- 18 "Understanding" of external space generated by bodily re-mapping: an insight from the neurophysiology of tool-using monkeys 439
ATSUSHI IRIKI
- 19 Left-right spatial discrimination and the evolution of hemispheric specialization: some new thoughts on some old ideas 456
WILLIAM D. HOPKINS AND CLAUDIO CANTALUPO

Part V

Comparisons of human and nonhuman primate spatial cognitive abilities 475

- 20 The geographical imagination 477
RICHARD SAMBROOK AND DAVID ZURICK

21	Of chimps and children: use of spatial symbols by two species	486
	JUDY S. DELOACHE AND MEGAN BLOOM PICKARD	
22	Chimpanzee spatial skills: a model for human performance on scale model tasks?	502
	SARAH T. BOYSEN AND KIM A. BARD	
23	The development of place learning in comparative perspective	520
	AMY E. LEARMONTH AND NORA S. NEWCOMBE	
24	Spatial cognition and memory in symbol-using chimpanzees	539
	CHARLES MENZEL	
	<i>Index</i>	565

Colour plates appear between pages 320 and 321.
