

CONTENTS

PREFACE v

CHAPTER 1 ∞ INTRODUCTION TO LANDSCAPE ECOLOGY I

- What Is Landscape Ecology? 2
- Why Landscape Ecology Has Emerged as a
Distinct Area of Study 7
- The Intellectual Roots of Landscape Ecology 10
- Objectives of This Book 20
- Summary 21
 - Discussion Questions* 22
 - Recommended Readings* 23

CHAPTER 2 ∞ THE CRITICAL CONCEPT OF SCALE 25

- Scale Terminology and Its Practical Application 27
- Scale Problems 32

Scale Concepts and Hierarchy Theory	34
Identifying the "Right" Scale(s)	38
Reasoning About Scale	40
Scaling Up	40
Summary	43
<i>Discussion Questions</i>	44
<i>Recommended Readings</i>	45

CHAPTER 3 ∞ INTRODUCTION TO MODELS 47

What are Models and Why Do We Use Them?	47
Steps in Building a Model	56
Landscape Models	64
Caveats in the Use of Models	66
Summary	67
<i>Discussion Questions</i>	68
<i>Recommended Readings</i>	69

CHAPTER 4 ∞ CAUSES OF LANDSCAPE PATTERN 71

Abiotic Causes of Landscape Pattern	73
Biotic Interactions	83
Human Land Use	86
Disturbance and Succession	90
Summary	90
<i>Discussion Questions</i>	92
<i>Recommended Readings</i>	92

CHAPTER 5 ∞ QUANTIFYING LANDSCAPE PATTERN 93

Why Quantify Pattern?	93
Data Used in Landscape Analyses	95
Caveats for Landscape Pattern Analysis, or "Read This First"	99
Metrics for Quantifying Landscape Pattern	108
Geostatistics or Spatial Statistics	125

Summary	132
<i>Discussion Questions</i>	133
<i>Recommended Readings</i>	134

CHAPTER 6 ∞ NEUTRAL LANDSCAPE MODELS 135

Random Maps: The Simplest Neutral Model	138
Maps with Hierarchical Structure	147
Fractal Landscapes	149
Neutral Models Relating Pattern to Process	153
General Insights from the Use of NLMs	153
Summary	155
<i>Discussion Questions</i>	156
<i>Recommended Readings</i>	156

CHAPTER 7 ∞ LANDSCAPE DISTURBANCE DYNAMICS 157

Disturbance and Disturbance Regimes	159
Influence of the Landscape on Disturbance Pattern	162
Influence of Disturbance on Landscape Pattern	174
Concepts of Landscape Equilibrium	188
Summary	196
<i>Discussion Questions</i>	198
<i>Recommended Readings</i>	199

CHAPTER 8 ∞ ORGANISMS AND LANDSCAPE PATTERN 201

Conceptual Development of Organism-Space Interactions	204
Scale-Dependent Nature of Organism Responses	221
Effects of Spatial Pattern on Organisms	229
Spatially Explicit Population Models	240
Summary	243
<i>Discussion Questions</i>	246
<i>Recommended Readings</i>	247

CHAPTER 9 ∞ ECOSYSTEM PROCESSES IN THE LANDSCAPE

249

Spatial Heterogeneity in Ecosystem Processes 251

Effects of Landscape Position on Lake

Ecosystems 261

Land–Water Interactions 265

Linking Species and Ecosystems 280

Searching for General Principles 284

Summary 285

Discussion Questions 287

Recommended Readings 288

CHAPTER 10 ∞ APPLIED LANDSCAPE ECOLOGY 289

Land Use 290

Forest Management 307

Regional Risk Assessment 314

Continental-Scale Monitoring 319

Summary 321

Discussion Questions 324

Recommended Readings 325

CHAPTER 11 ∞ CONCLUSIONS AND FUTURE DIRECTIONS

327

What Have We Learned? 328

Research Directions 329

Conclusion 331

Discussion Questions 332

Recommended Readings 332
