<i>List of Contributors</i>	vii	3.3 Morphodynamics and shoreface equilibrium	50
<i>Preface</i>	viii	3.4 Morphodynamic time scale and external controls	67
<i>Acknowledgments</i>	x	3.5 Summary	69
<i>List of Notations</i>	xi		
PART A. BEACH SYSTEMS: DEFINITION AND GLOBAL PERSPECTIVE	1	4 The surf zone	72
1 Beaches	3	<i>Troels Aagaard and Gerhard Masselink</i>	
<i>Andrew D. Short</i>		4.1 Introduction	72
1.1 Introduction	3	4.2 Wave transformation and wave set-up	72
1.2 Two-dimensional beaches	5	4.3 Infragravity wave motion in the surf zone	79
1.3 Three-dimensional beaches	8	4.4 Surf zone currents	88
1.4 Beach components and boundary conditions	9	4.5 Sediment transport	96
1.5 Beach classifications	13	4.6 Bar morphology	113
1.6 Beach Quantification	13	5 The beachface	119
1.7 Beach morphodynamics	13	<i>Michael Hughes and Ian Turner</i>	
1.8 The study of beaches	14	5.1 Introduction	119
1.9 Rationale for beach studies in the 21st century	17	5.2 Swash kinematics	119
		5.3 Beachface slope	128
2 Global variation in beach systems	21	5.4 Berms	133
<i>Andrew D. Short</i>		5.5 Beach step	135
2.1 Global variation in beach systems	21	5.6 Swash cusps	138
2.2 Coastal boundaries	21	5.7 Concluding remarks	144
2.3 Global climates	22	6 The beach backshore and beyond	145
2.4 Global coastal sediments	25	<i>Patrick A. Hesp</i>	
2.5 Beach sediments	26	6.1 Introduction	145
2.6 Global wave climates	26	6.2 Backshore beach morphology	145
2.7 Global and coastal tide regimes	34	6.3 Backshore sand transport	146
2.8 Summary	35	6.4 Backshore aerodynamics	149
		6.5 Beach – Backshore – dune sediment transport	151
PART B. BEACH MORPHODYNAMICS	37	6.6 Impact of salt aerosols	151
3 The shoreface	39	6.7 Overwash processes and deposits	152
<i>Peter J. Cowell, David J. Hanslow and Justin F. Meleo</i>		6.8 Swash-deposited backshore landforms	153
3.1 Introduction: definition and significance	39	6.9 Backshore dunes	155
3.2 Morphological scale	41	6.10 Erosional and transgressive dunes	160
		6.11 Summary	169

PART C. BEACH TYPES AND APPLICATIONS	171	10.3 Modification by cold climates	255
7 Wave-dominated beaches	173	10.4 Modification by tropical climates	258
<i>Andrew D. Short</i>		10.5 Modification of beach parameters	264
7.1 Introduction	173	10.6 Summary	269
7.2 Historical perspective	173	11 Beach ecology	271
7.3 Wave-dominated beach types	177	<i>Andrew D. Short and Patrick A. Hesp</i>	
7.4 Sequential beach changes	195	11.1 Introduction	271
7.5 Multi-bar micro-tidal beaches	198	11.2 Beach habitats	271
7.6 Beach 'state' curves: beaches in time and space	199	11.3 Beach organisms	271
8 The effect of tides on beach morphodynamics	204	11.4 The beach energy system	273
<i>Gerhard Masselink and Ian L. Turner</i>		11.5 Beach ecology and beach systems	274
8.1 Introduction	204	11.6 Physical implication	276
8.2 Tide-induced migration of hydrodynamic processes	205	11.7 Summary	278
8.3 Tide-induced fluctuations of the beach groundwater table	209	12 Beach and dune stratification	279
8.4 Morphological response to tides	213	<i>Andrew D. Short and Patrick A. Hesp</i>	
8.5 The parameterisation of tidal effects	217	12.1 Introduction	279
8.6 A morphodynamic classification of tidal beaches	221	12.2 Boundary layer processes	279
8.7 Summary	229	12.3 Beach type and stratification	281
9 Embayed and structurally controlled beaches	230	12.4 Dune stratification	288
<i>Andrew D. Short and Gerhard Masselink</i>		12.5 Summary	291
9.1 Introduction	230	13 Beach hazards and safety	293
9.2 Beach planform	230	<i>Andrew D. Short</i>	
9.3 Beach morphodynamics	233	13.1 Introduction	293
9.4 Beach rotation	240	13.2 Beach hazards	293
9.5 Headland sand bypassing	240	13.3 Wave-dominated beach hazards	295
9.6 Structural impacts	240	13.4 Tide-modified beach hazards	298
9.7 Summary	249	13.5 Beach hazard rating	299
PART D. BEACH SYSTEMS AND IMPACTS	251	13.6 Applications to beach management	301
10 Beach Modification: natural impacts on beach morphodynamics	253	13.7 Summary	303
<i>Andrew D. Short</i>		PART E. LARGE SCALE BEACH BEHAVIOUR	305
10.1 Introduction	253	14 Barrier morphodynamics	307
10.2 Determining beach type, circulation and bar number	253	<i>Patrick A. Hesp and Andrew D. Short</i>	
		14.1 Introduction	307
		14.2 The origin of barriers	307
		14.3 Factors contributing to barrier type and evolution	308
		14.4 Barrier morphodynamics and types	317
		14.5 Controls on barrier evolution	331
		14.6 Conclusion	333
